### **CLIENT REMARKS**

	_	

## **Recommended actions:**

- **PO4** - Level of PO4 is too high, if you want to lower it, do a water change and use Phosphate Minus and NitraPhos Minus. You can also use Pro Bio S and -NP Pro.

- Co - Level of cobalt is too low. Please remember, that maximum safe daily dose is 1 ml per 100 litres of water. If you need a higher dose, split it into a few days. Correct the result by using: <u>Cobaltum</u>.
Suggested dosage for your tank: 1.4 ml

- Fe - Level of iron is too low. Please remember, that maximum safe daily dose is 1 ml per 100 litres of water. If you need a higher dose, split it into a few days. Correct the result by using: Ferrum. Suggested dosage for your tank: 7.8 ml

- I - Level of iodine is too high, if you want to lower it, do a water change.

- Li - Level of lithium is too high, if you want to lower it, do a water change.

- Mn - Level of manganese is too low. Please remember, that maximum safe daily dose is 1 ml per 100 litres of water. If you need a higher dose, split it into a few days. Correct the result by using: Manganum.
Suggested dosage for your tank: 1.9 ml

- Mo - Level of molybdenum is too high, if you want to lower it, do a water change.

- Ni - Level of nickel is too low. Please remember, that maximum safe daily dose is 2 ml per 100 litres of water. If you need a higher dose, split it into a few days. Correct the result by using: Niccolum.
Suggested dosage for your tank: 11 ml

- V - Level of vanadium is too low. Please remember, that maximum safe daily dose is 1 ml per 100 litres of water. If you need a higher dose, split it into a few days. Correct the result by using: <u>Vanadium</u>.
Suggested dosage for your tank: 2.6 ml

- **P** - Level of phosphorus is too high, if you want to lower it, do a water change and use Phosphate Minus or NitraPhos Minus. You can also use Pro Bio S combined with -NP Pro.

- K - Level of potassium is too low. Please remember, that maximum safe daily dose is 20 ml per 100 litres of water. If you need a higher dose, split it into a few days. Correct the result by using: **Kalium**. Suggested dosage for your tank: 72 ml

- **Sr** - Level of strontium is too low. Please remember, that maximum safe daily dose is 10 ml per 100 litres of water. If you need a higher dose, split it into a few days. Correct the result by using: **Strontium**. Suggested dosage for your tank: 57.6 ml
